

## "Advance Hernia Surgery Symposium"

### Invitation

Dear Colleagues,

Welcome to "Advanced Hernia Surgery Symposium" (AHSS).

On behalf of the organizing committee, it is our pride and privilege to invite you all for the Advanced Hernia Surgery Symposium to be held at BPKIHS, Dharan Nepal, one of the beautiful tourist destinations of Nepal. The Organizing Committee is working hard to make this workshop a special one for all of you.

Living to its reputation, AHSS plans to provide a highly academic scientific feast, catered by a galaxy of medical faculty, renowned surgeons and eminent speakers of national and international repute.

Friends, it is our humble appeal to all of you to rush and register today and be part of the change. Your early registration will boost our enthusiasm to work harder and contribute even better towards serving you all. We at AHSS believe to work hard in silence, let our success be your noise. We look forward to welcoming you to an unforgettable location. We look forward to make your stay pleasant and productive.

## "Advance Hernia Surgery Symposium"

B. P. Koirala Institute of Health Sciences, Dharan, Nepal

19-20 January 2024

### Course objectives

The mission of Advance Hernia Surgery Symposium is to provide a professional forum for education and exchange of information on diagnosis and management of abdominal wall hernias. The vision is to impart awareness about the art and safe practice of contemporary hernia surgery in the region.

This program has been designed as a structured and systematic introduction to best established international hernia surgery practices that exist today.

The Hernia Surgery Summit academic fest is based on current international guidelines (EHS, APHS, SAGES, IEHS and Hernia Surge guidelines) on hernia management. The aim is to present a comprehensive training course for practicing surgeons on hernia management (both laparoscopic and open). A standard and uniform course content has been created that is delivered by national and international faculty in one day course.

### Who should attend

- Surgical trainees and practicing surgeon who want to learn open and laparoscopic skills in the management of abdominal wall hernia.
- Health professionals who want to update their knowledge and skills in the management of abdominal wall hernia.
